

ANAND KASHYAP

Senior Software Engineer (Android) | Immediate Joiner | Kotlin | Java | MVVM | 8 Years Experience
anandkashyap600@gmail.com | +91 8077087072 | Noida, India | [linkedin.com/in/anand-kashyap-software-engineer](https://www.linkedin.com/in/anand-kashyap-software-engineer)

PROFESSIONAL SUMMARY

Results-driven Senior Android Developer with 8+ years of experience building scalable, high-performance mobile applications for 100M+ user platforms. Proven expertise in Kotlin, MVVM, and Clean Architecture with a strong track record of reducing crash rates, improving app performance, and delivering end-to-end features at Adobe-scale. Experienced in CI/CD automation, multi-module architecture, and cross-functional team collaboration in Agile environments.

TECHNICAL SKILLS

- **Languages:** Kotlin, Java, C++
- **Frameworks & Architecture:** Android SDK, MVVM, Clean Architecture, Multi-module, Jetpack Compose
- **Libraries:** Retrofit, Hilt/Dagger, Room, Firebase, Coroutines, Flow/StateFlow, WorkManager, Paging 3
- **Testing:** JUnit, Espresso, Mockito
- **Tools & DevOps:** Git, Jenkins, Jira, Gradle, CI/CD, Android Studio
- **AI Development Tools:** Claude (Anthropic), GitHub Copilot, Cursor — used for code generation, debugging, and accelerating feature development
- **Concepts:** Multithreading, Performance Optimization, Memory Management, REST APIs, Debugging

WORK EXPERIENCE

SDE 3 (Android) | Adobe

Nov 2022 – July 2026

- Led end-to-end feature development for Adobe Express and Photoshop Express — apps used by 100M+ users globally — using Kotlin and MVVM Clean Architecture
- Reduced app crash rates by ~20% by debugging and resolving critical production issues, significantly improving stability and user retention
- Optimized memory usage for high-resolution media operations, improving app responsiveness by ~30% on mid-range devices
- Contributed to CI/CD pipeline improvements using Jenkins, reducing Android build and release cycle time by ~25%
- Drove modular architecture adoption across the team, improving code maintainability and enabling parallel feature development
- Participated in architectural design reviews and contributed scalable solutions that are currently in production
- Collaborated closely with product managers, designers, and QA teams in Agile sprints to deliver features on schedule
- Owned features from requirements through development, testing, and production support with zero critical post-release bugs
- Leveraged AI development tools (Claude, GitHub Copilot, Cursor) to accelerate feature delivery, improve code quality, and reduce debugging time by ~30%

Senior Software Engineer (Android) | Webkul

May 2019 – Nov 2022

- Built and shipped 10+ Android applications for e-commerce clients using Kotlin, REST APIs, and Magento/WooCommerce integrations
- Reduced API response time from ~800ms to ~300ms by implementing request caching, pagination, and network call optimization
- Mentored 3 junior Android developers, conducting code reviews and technical training that reduced PR rework by ~30%

- Improved app performance, reducing memory usage by ~20% through profiling and targeted optimizations
- Collaborated with web and backend teams to ensure consistent cross-platform user experiences
- Established testing and debugging practices that improved overall code quality and reduced QA cycles

Android Developer | Adventure Infotech

2018 – 2019

- Developed Android applications from scratch and integrated REST APIs for client-facing mobile products
- Gained foundational experience in Android SDK, Java/Kotlin, and mobile UI design principles

KEY PROJECTS

Adobe Express (100M+ Users)

- Led development of core content creation features including media editing and template rendering modules
- Improved performance for media-heavy operations, reducing frame drops and increasing UI responsiveness
- Tech Stack: Kotlin, MVVM, Hilt, Coroutines, CI/CD (Jenkins)

Adobe Photoshop Express (100M+ Users)

- Optimized memory handling pipeline for high-resolution image processing on Android, reducing OOM crashes by ~40%
- Improved rendering performance for filters and adjustments on large images across low-to-mid-range devices
- Tech Stack: Kotlin, RenderScript, MVVM, Clean Architecture, Room

E-Commerce Mobile Suite – Webkul

- Built a suite of Android apps for Magento, OpenCart, and WooCommerce platforms used by 50+ global clients
- Led a team of 3 developers, handled client communication, and delivered projects within agreed timelines
- Tech Stack: Kotlin, Retrofit, REST APIs, Room, Jetpack Compose, Firebase

EDUCATION

BCA – Bachelor of Computer Applications (2014 – 2017)

MJP Rohilkhand University

LANGUAGES

English (Professional), Hindi (Native)
